## Statement by Member of the Ukrainian Parliament, Alexander Dubinsky

The events of the past hours - the public humiliation of Zelensky at the White House, Trump's acknowledgment of Zelensky's diplomatic failure, and Ukraine's loss of unconditional U.S. support - have marked the final act of the regime's collapse. But Zelensky has not only failed in foreign policy - **he has driven the country into a state where anyone who disagrees with his course faces repression.**

I was thrown into prison not for a crime, but for speaking the truth. The very truth that Trump has now stated: **Zelensky has lost.** He has no cards left to play, he is running out of soldiers, and the country has reached a dead end due to his stubbornness.

**I demand the immediate convening of an emergency session of the Parliament, where Parliament must initiate impeachment proceedings against Zelensky for:**

- the failure of foreign policy, which has led to Ukraine's international isolation and the loss of allied support.
- a lost war, which is the result of incompetent leadership and catastrophic decisions.
- violations of citizens' rights and the usurpation of power, manifested in the suppression of the opposition, persecution of dissenters, and authoritarian rule.

**I appeal to all Members of the Ukrainian Parliament: stop wasting time, stop waiting! Zelensky is bankrupt. Zelensky is not Ukraine! It is time to put him on trial. If he cannot offer a real way out of the crisis, then it is up to us to make fateful decisions.**

Zelensky thought he could rule Ukraine through force. Now he has lost.

Ukraine must decide - will it continue its freefall into the abyss, or will it begin the fight for true independence?

**Alexander Dubinsky**

**Member of the Ukrainian Parliament**
